## **Lutron Homeworks Illumination 1.62 HOV Full Version**

In order to maximise the effectiveness of this guide, the user should be well-versed in HomeWorks technology and be aware of any limitations of HomeWorks products. How to use this guide In order to help you more quickly get started with your upgrade, it has been divided into three sections:

HomeWorks Configuration, Installation and Troubleshooting. These are the three initial stages of any upgrade. The order is that the components are installed in the order listed, and you should first complete the installation and testing of the components in the order described. If you have

---

HomeWorks-specific troubleshooting information, then you should make reference to that. Once you have completed the initial stages of your HomeWorks installation, it is also a good idea to refer to the troubleshooting sections of this guide.

You can refer back to this guide as and when required. The HomeWorks QS system has been described on the following pages: HomeWorks Configuration Installation Troubleshooting This section provides a description of the individual components of the QS system. All of the HomeWorks components can be found on a HomeWorks QS system from a minimum of six points. These points are: Left corner Right corner Top center Bottom center Middle center Nose The

---

all points can be accessed on the Control Panel. The following sections cover each of these points in more detail:

**Left and right corners** The left and right corners should be fitted with wall clips. These are integral to the HomeWorks-specific design of the system. The wall clips must be fitted in two positions - one on each side of the lighting point. These wall clips contain the switch for the relevant control.

**Installation of wall clips** The wall clips should be placed at the left and right corners of the room in which you intend to install a QS system. The wall clips should be installed with a gap between the control and the wall clips. Install the wall clips according to the following steps: Plug the wall clips into the nearest wall socket, ensuring the correct

---

orientation is noted on the wall clips. This will make it easier to find the correct wall socket for the next step. Next, connect the power cable to
