I can get id and game\_name, but I want to get all names of particular game. Could you please help me to get all names of particular game? I have tried like this {{ \$ctrl.id.cls }} {{ \$ctrl.game\_name }} A: If you need to have json instead of an array in the template, then your controller would have to be changed to this:  
Controller: controller: 'use strict'; return function (UserService) {
