

ProCoder Software for . Data for ProCoder 3 can now be created in more than 40 formats and saved to the computer in a variety of file types. This allows video editors to work with any information they want to edit on their own computer. This can be all footage, all audio, a single clip or even a sequence of clips. For any of these situations, the ProCoder 3 workflow can help you complete the process quickly and efficiently. With 32-bit and 64-bit support, ProCoder 3 can be used with most software, game, and hardware components. This is also very important for support and repair professionals. ProCoder 3 may also be used as an excellent tool for high-volume production. 8 media source formats. Easily convert any media format to any other. ProCoder 3 software has full support for all major file types such as AVI, MOV, MP4, WV, VOB, 3GP, etc. You can freely trim, crop, join, split and convert video files. Quickly process multiple video formats in one click. Detailed recording. ProCoder 3 software allows you to make complete CD/DVD discs

from any video information and allows you to convert DVD-9/ -5, DVD-5/ -9 or write an NTSC standard DVD video directly to disc. In addition, you can create CD/DVD image files from any DVD/CD/VCD and provide a single output format. Detailed audio. ProCoder 3 software allows you to make complete audio CD-R or CD-RW discs from any audio information and provides a consistent output for different CD or CD-RW media. The software provides you with the tools to tune your audio after processing, achieve volume control, and equalize audio with variable and fixed waveforms. Using Grass Valley ProCoder 3 you can take any video and audio from any format and. ProCoder 3 software provides three different workflow modes to meet the needs of many different users. These are Windows Workflow Foundation (WF) workflow, Windows Workflow Foundation control, and Windows Workflow 4. The WF modes automatically capture all the information in an edited file and do not require any user input. The control mode allows users to edit the workflow after it has been created and is fully customizable. The Windows Workflow 4 mode is designed to offer step-

by-step or time-based workflow on the workflow editor only. Using all three methods, you can create CD/
