If I want to make a change to the master branch on the remote repo, I would do something like git checkout master git remote add sftp://some.host.com/repos/test.git git commit -am 'blah' git push sftp://some.host.com/repos/test.git master ...and then something similar if I want to make a change to the dev branch. Now, if I want to make a change to the master branch, but to a branch that's not the one I previously pushed to, I have to do git checkout master git push sftp://some.host.com/repos/test.git dev ...and if I want to make a change to the master branch on the remote repo to a branch that's not previously pushed, I have to do git checkout master git push sftp://some.host.com/repos/test.git dev ...which means that I have to do the push twice. I'd like to simply do git checkout master git push sftp://some.host.com/repos/test.git dev ...which would push both master and the new dev branch to the remote. Is this possible? A: \$ git push sftp://some.host.com/repos/test.git master With git

That's because the anti-gay hate group's lead attorney was disbarred last year for misconduct. When that happened, David Kline stepped in as the official "attorney for the board." Kline was a former employee of the American Family Association, which is why he didn't need to apply to become licensed. Because the American Family Association went bankrupt, they had to close all their operations. If Kline is still a member of the American Family Association, then it's possible that he is still an employee. But it's more likely that he's still just a member of the American Family Association's policy board. Which means he's a threat to anyone who wants to apply for a license. Kline was disbarred by the Utah Supreme Court in 2008 for his role in a mortgage scam. The story was reported by the Salt Lake City Tribune. Treatment of tuberculosis in the post HIV epidemic era. The incidence of tuberculosis is falling worldwide, and the main reasons include the success of treatment and the impact of HIV infection. However, tuberculosis remains a major cause of mortality and morbidity, particularly among people with HIV infection. In the post HIV epidemic era, there is a need to reassess the best strategy for tuberculosis treatment. The recommendations of the World Health Organization on drug-susceptible tuberculosis and multidrug-resistant tuberculosis are discussed and their relevance to the specific circumstances in low-income countries are highlighted. The place of recently licensed drugs in the treatment of tuberculosis is evaluated. In fact, the only name on the Post's editorial page that has never been involved with the media conglomerate is one that is rarely noticed by the public: the newspaper's senior editor, Susan Glasser. "She's the only person at the Post whom nobody knows," says Matt Pearce, who wrote a profile of Glasser for Politico in 2015. "You won't see her on television or on a morning talk show, but she
