Download Advanced SystemCare PRO 5.5.0.543 Common issues with Windows 7 - x64 Missing hardware devices How to Fix Always check for and install missing drivers. If you see "Unknown device" in Device Manager, it will tell you what driver the device needs. If you don't know what driver to install, search the web for the model number of your device and a list of devices it supports. Your HP, Dell, Acer, Asus, or Toshiba laptop will not turn on How to Fix Sometimes uninstalling the device driver can reset the problem. Click on Start button, type ncpa.cpl in the search box, and press Enter. You will see a list of installed devices. Select the device that is no longer functioning, and click Uninstall. You will now see a new screen. Click on the Driver tab, then click on Update Driver. Select the "Choose a Driver" option, and then click on the "Browse my computer for driver software" button. Select "Let me pick from a list of device drivers on my computer" and then click on "Next". Select "Cannot locate driver software" and click on "Next". Click "Install from a list of device drivers" and then click on "Finish". You will now see a list of device drivers, including the current driver, and the old driver. Click on the old driver, and click on Remove. A warning dialog box will appear, and you will have to click on OK. Your device will now restart automatically. Your HP, Dell, Acer, Asus, or Toshiba laptop will not start up
