Origin 62 An eight-voice analog FM synth & effects with MIDI control sequencer. MIDI and I/O for your audio interface or DAW. MIDI learn to control the OSC. Creative 3D Printing Is 3D printing just a neat toy for children or a disruptive technology like the personal computer, and now also the smartphone and smart watch, that can change our lives for the better? Our graphic designer Cristina Niederberger, is already collaborating with 3D printers to create interactive artworks. Out of work and creative 3d printing Suddenly 3D printing is getting a lot of media attention as an affordable tool for fast prototyping. In spite of a great number of 3D printers that are around, the most advanced are still too expensive for many people. Now, there's a new media movement that takes 3D printing to its limits - it's the out-of-work generation, with its disposable income and the latest technology at its disposal, who are using 3D printing and service-based businesses. Hooverdam is like a mechanism for collecting different interests in the same place. A place where everything is possible and nothing's impossible. Using a 3D printer as a camera flash stand, I made a 3D Printer Model out of the massive crane I found on a railway station parking lot in Amsterdam. One of the developments in 3D printing is that it can be used for functional items. A funny example is the 20cm tall toilet paper holder, which I 3D printed at the factory. 3D printing a present 3D printing is a growing trend, but there are still many limitations. As long as the design process is not automated, 3D printing doesn't seem like a quick and easily accessible alternative to other manufacturing methods, which can be easily outsourced to China. At Labia Studio we are working on functional items using 3D printing. We 3D print adhesives as a replacement for glue, and also additively printed our own replacement for teflon, a material which can actually help to prevent damage. When you look under a microscope, you can see different details, like nanoscale layers that seem almost invisible in a photo. My 3D printer is a gift to my children My 3D printer is a gift for my children, they have to start creating their own 3D models soon. It's easy with Google SketchUp and a 3D printer
